

Tift & Tift Table

- ▲ The Lift &Tilt Tables from HU-LIFT are specifically designed to allow an operator to feed and unload parts from tote boxes or containers quickly and easily without lifting, bending, stretching, or reaching.
- ▲ When in its lift and tilt position, the unit holds totes or containers at a comfortable working height and angle that allows operators to easily reach parts even at the bottom of the container.
- ▲ The working table is elevated by means of a foot actuated hydraulic cylinder. As the table is raised, it automatically tilts to an angle of 45° at full elevation. Built-in retaining lip keeps containers in place.
